

SENSES

S ENSES help me to
E njoy all the
N atural and beautiful things to
S ee, feel, hear, smell and taste –
E verything I need to
S ENSE the world around me.

E YES let me see
Y ou;
E yes give me
S ight.

H ANDS let me touch
A nd feel cold or warm things,
N otice rough or smooth,
D etect wet or dry and they can
S troke gently or grip strongly.

E ARS listen and hear
A lot of different sounds.
R eceive messages and
S ense loud and soft noises

N OSES give the smell
O f fresh air,
S ausages and bacon,
E very flower, and the
S cent of the sea.

T ONGUES test the taste
O f food and flavour:
N ice or nasty,
G ood or bad,
U npleasant or delicious.
E verything we eat
S lides past our tongues.

by Brenda Williams

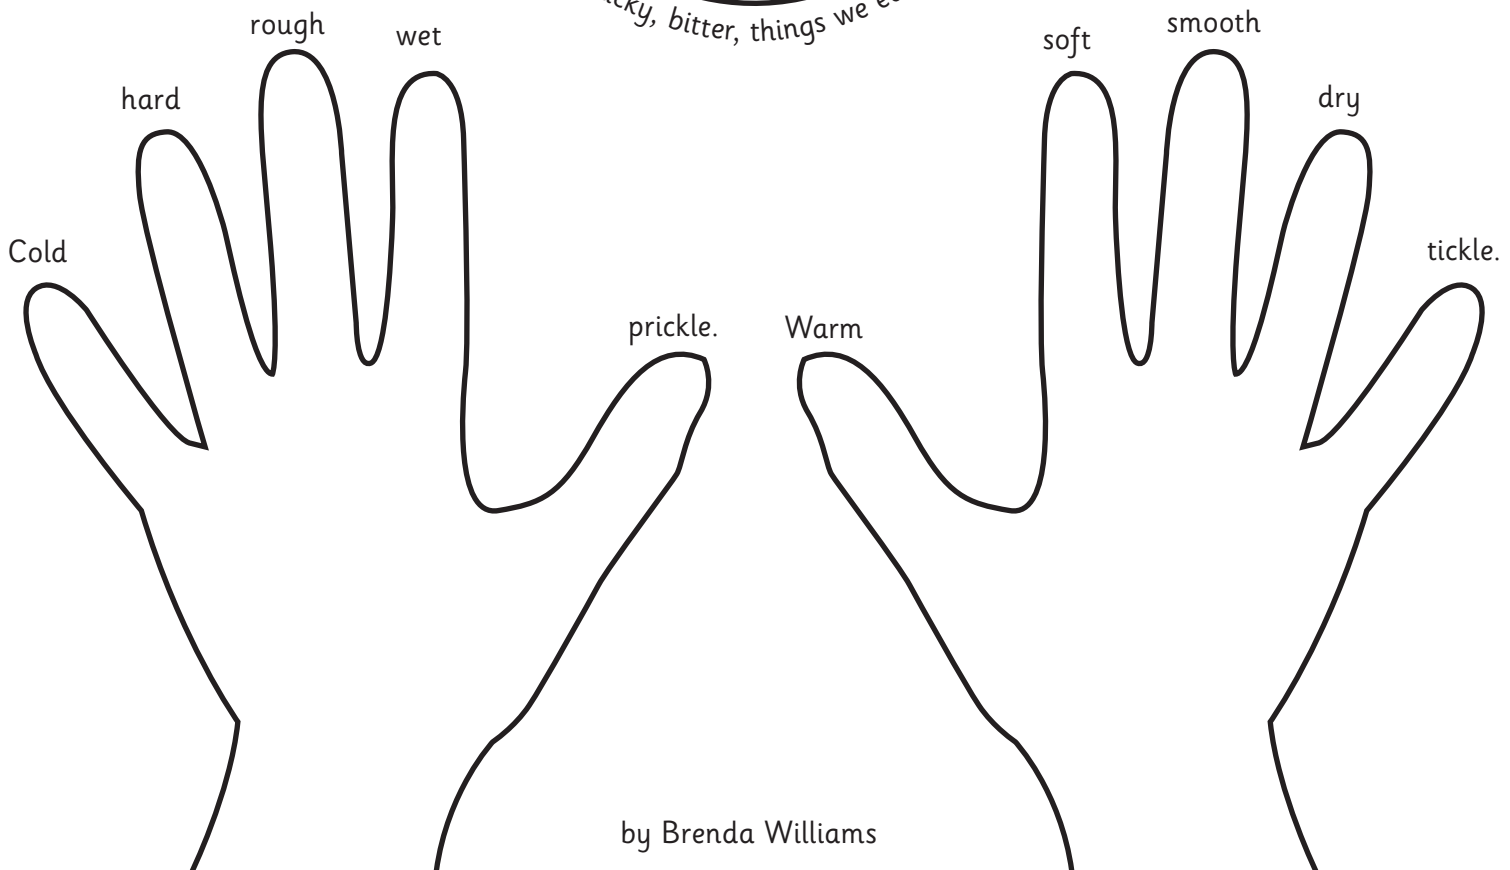

Let's face it!

Ugly, dreary, dull or dim
Eyes can let all pictures in.

Bright, sunny, lovely, light,
Eyes can give us such delight.

Poohy, pongy, stinky whiff,
Horrid smells, a nose can sniff.

Tasty, yummy, chewy, sweet,
Yucky, bitter, things we eat.
